

Flood Inundation map [SUPARCO GRID-3] for the KYYBER-PAKHTOONKHWA Province, Pakistan

- Flood Inundated area
- Pre Disaster River line
- Settlements
- Scrub/Shrub
- Forest
- Cropland
- Others

Primary Source

Satellite Data used :
 After Crisis
 AVINIR- JAXA ALOS 05 August 2010
 Before Crisis
 Landsat ETM+ 2001 (River delineation)

Overview of Flood Inundation Map for the Khyber-Pakhtoonkhwa province. This map presents the flood inundated areas for the grid suggested by SUPARCO, Pakistan following recent heavy monsoon rains. This analysis is based on pre and post-disaster satellite imagery collected by AVINIR – JAXA ALOS and Landsat data.

Flood inundated areas were classified using supervised classification method. Please note that the exact limit of the flood waters is uncertain as it has not been validated in the field. Pre-disaster map was prepared using Landsat ETM+ to identify extended of damage. Please send ground feedback to MENRIS Division, ICIMOD.
