

Analysis on Flood Affected Areas along the Indus River, Parts of Sindh Province, Pakistan

24 August 2010
FL-2010-000141-PAK
Version 1.0

This map presents a preliminary analysis of flood affected areas covering part of Sindh province, Pakistan and is based on AVINIR-ALOS satellite imagerys covering the period of August 23, 2010.

Till August 23, 2010 approx. 3492.08 sq.km are severely affected by flood waters. Over 184 villages and several square kilometers of cart road and main roads are partially submerged or severely inundated by flood waters. This analysis was performed using geospatial database received from University of Georgia, google earth for counting villages/towns.

This analysis also used Pre-flood river line data from NIMA/USGS to show the extent of flood water only. This analysis has not yet been validated in the field. Please send ground feedback to ICIMOD / MENRIS.
