

# Mapping Inundation extent for Madhepura and Bhagalpur districts (Bihar) using ESA Sentinel-1 Satellite Data on 11 Aug 2017

North-eastern India, southern Nepal and Bangladesh received heavy rainfall during the last few days, which caused widespread flood claiming 160 human lives and displacing millions of people from their homes.

Indian state of Bihar, which receives most of the flood waters from rivers in upstream Nepal is also seriously affected in the ongoing disaster event. Four districts located along the Indian-Nepal border in Bihar Kishanganj, Araria, Purnea and Katihar districts are under high inundation affecting nearly one million people. Flood inundation and damages are also reported in other districts Darbhanga, Madhubani, Sitamarhi, Madhepura, Saharsa, Supaul as well as East and West Champaran.
