

Appendix

(1). Download the QGIS version 3.40

<https://qgis.org/download/>

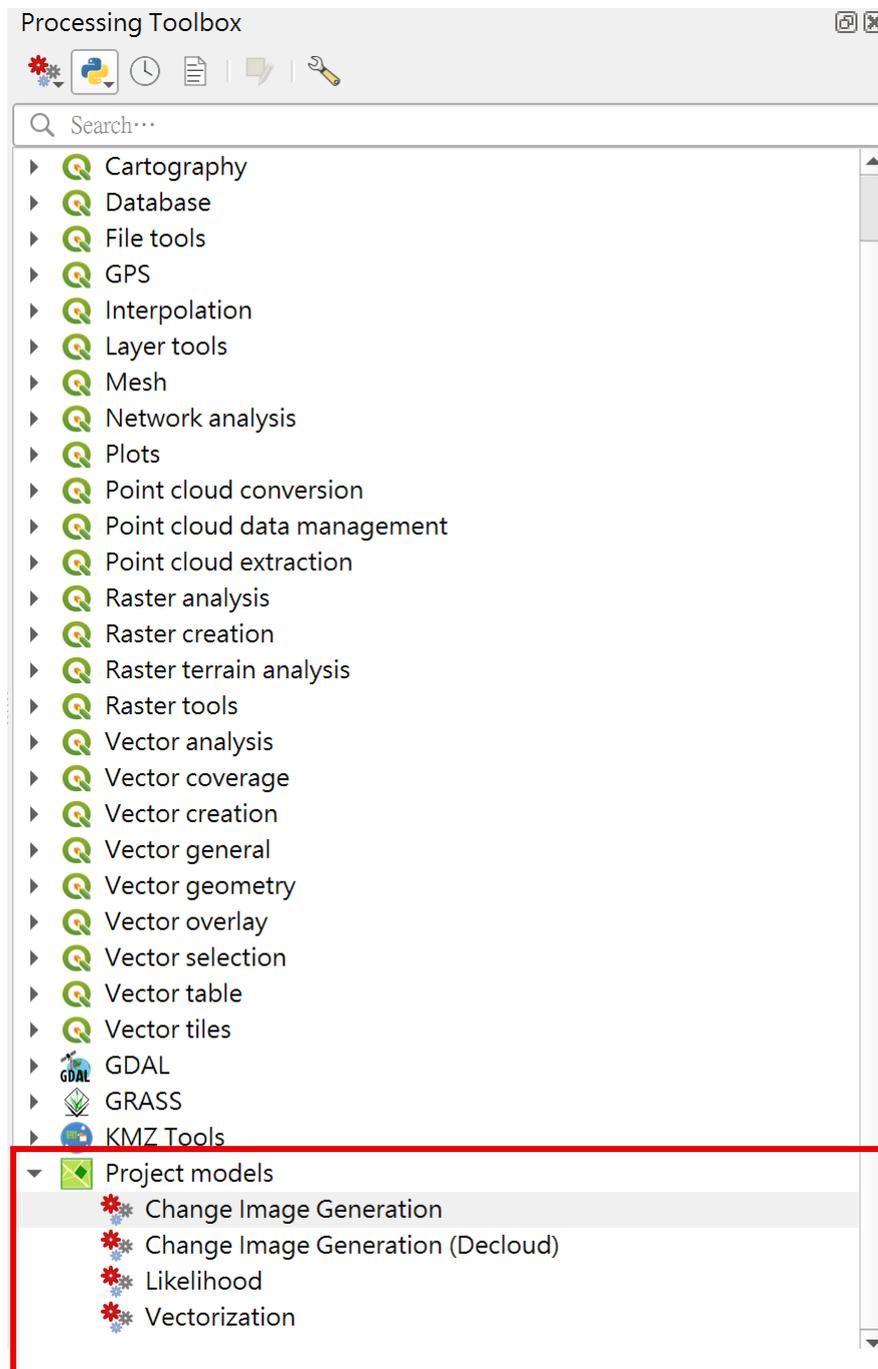

(2). Double click and install

(3). After install the software, double click to open the QGIS project

“EVAP_General_Version.qgz”, then you can see the “Project models” in the dropdown menu of Processing Toolbox.

Tips:

If you are using an earlier version of QGIS (e.g., 3.22), please use “EVAP.3.22._General_version.qgz” due to capacity limitations.

Please download the following lecture materials for the lecture on “EVAP Concept Overview and Workflow in QGIS” by TASA on Day3.

lecture materials:

(1) Software: QGIS 3.40 *Please find Appendix to install the software

(2) QGIS project “EVAP_General_Version.qgz” and
“EVAP.3.22._General_version.qgz”.

(3) FORMOSAT-5 data and Sentinel-2 data (Please download data):
