Target World Bank's Initiative on Collaborative Data Innovations for Sustainable Development

- The World Bank is interested in supporting innovative collaborations for **data production, dissemination, and use**;
- The collaborations should take place in **low/lower-middle income** countries;
- This initiative was directed towards sustainable development generally, and linked to the **SDGs** in particular;
- Bring different types of organizations together and **contribute and integrate** their data.

Themes for the Funding

- **Scaling local data for impact**

WB is looking for innovations, which will provide more **detailed, disaggregated, in-depth information** to benefit local decision-making that can be replicated in other regions of the same country.

- **Fostering synergies between non-official data and official statistics**

WB is looking for **collaborations** which take advantage of the relative strengths and responsibilities of official (i.e., governmental) and non-official (e.g., private sector, civil society, social enterprises and academia) actors.

Criteria for Funding

- A link to specific data needs of monitoring or implementing the **SDGs**;
- Evidence of support and involvement from an **end-user** as part of the consortium;
- A minimum of **two collaborating organizations**, inclusive of the end-user;
- Be implemented in a **low- and/or lower-middle-income** country;
- A focus on the theme of scaling local data is required and a focus on the theme of fostering synergies between communities of **non-official data and official statistics**.

Our Proposal

- **Target SDG**

- SDG 11 - Sustainable cities & communities

- **Collaborators**

- (1) Japan Aerospace Exploration Agency (JAXA)

- (2) Asian Disaster Reduction Center (ADRC)

- **End Users**

- (1) Department of Disaster Management (DDM), Myanmar

- (2) Disaster Management Policy and Technology Center (DMPTC), Vietnam

Proposed Activities

- Prepare up-to-date **base-maps** are produced from freely available data;
- Development of **value-added products** with extensive field data collection;
- Develop Geodatabase and Web-GIS platform for **dissemination**;
- Build resilience to disasters by developing a **reliable, accurate, up-to-date and accessible** disaster-related data and information.

Thank you for your kind attention

A thick, blue, brushstroke-style underline that spans the width of the text above it. The stroke is slightly irregular, with a pointed left end and a flat right end.
