

DAN report in Yamaguchi University

Yamaguchi University

Director, Center for Research and Application for Satellite Remote Sensing

Masahiko Nagai

DAN Report (Yamaguchi University)

- ① Support International Disaster Operation in Sentinel Asia
- ② Support Domestic (Japan) Disaster with Sentinel Asia and International Disaster Charter
- ③ Support Sentinel Asia SC activity, Leading “Value Added Product (VAP)” team
- ④ Development of University Network for Massive Disaster
- ⑤ Development of Educational Material with MEXT

Storm & Typhoon Hagibis, Japan

Disaster Charter

-  Sentinel-1A, 1B
-  RESURS-P
-  LANDSAT-7,8
-  TerraSAR-X
-  KANOPUS_V
-  TANDEM_X
-  SPOT-6,7
-  PREIADES
-  CBERS-4
-  UK-DMC-2
-  WorldView-2
-  GeoEye-1
-  GF1
-  KOMPSAT
-  RADARSAT-2

DAN Report (Yamaguchi University)

- ① Support International Disaster Operation in Sentinel Asia
- ② Support Domestic (Japan) Disaster with Sentinel Asia and International Disaster Charter
- ③ Support Sentinel Asia SC activity, Leading “Value Added Product (VAP)” team
- ④ Development of University Network for Massive Disaster
- ⑤ Development of Educational Material with MEXT

Sentinel Asia

Strategic Plan
2017-2027

-Value Added Product (VAP)-

The document describes potential input for Sentinel Asia Action Plan 2017-2027, based on the issues and opportunities discussed and identified on October 2018.

- I. Satellite Data Provisions and Systems
- II. Value Added Product (VAP)**
- III. End-user Enhancement
- IV. Step-3 Activities (Complete DRR cycle)
- V. Communication, Collaboration and Cooperation

Main Topics

II . Value Added Product (VAP)

4.2.1 Research and Development (R&D)

4.2.1-1-S Standard Operation Procedure (SOP)

4.2.1-2-S Standardization of VAP.

4.2.1-3-L Researches on Urban Flood Mapping

4.2.2 Product Development

4.2.2-1-M VAP through University Network

4.2.2-2-M Review Data Policy and Data for R&D

4.2.2-3-M Identify the potential use case of VAPs in disaster

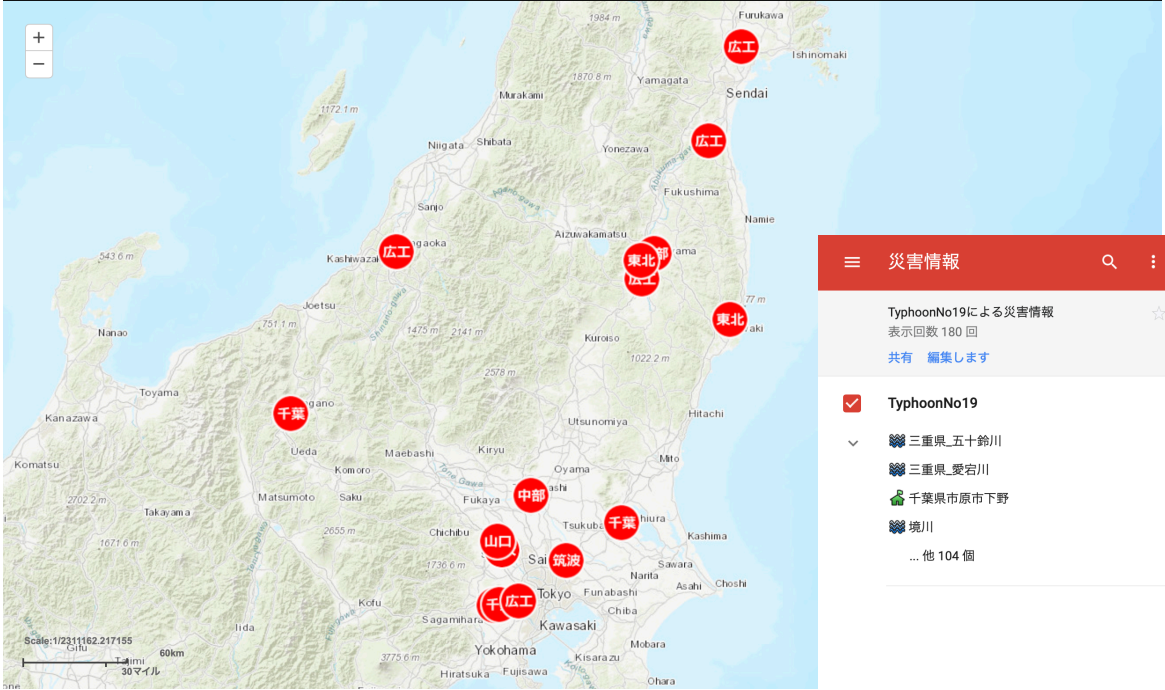

4.2.2-4-M In-situ data collection through GNSS

4.2.2-5-M Pre-disaster image repository and access

Problems with Growing Data Archive

- “Data download and work, then upload” is so inefficient!
 - Data size is so **huge** (esp. higher spatial/temporal resolution, more bands and wave lengths....).
 - And data transfer could be **slow**.
 - **Co-work** for an integrated product is **difficult**.
- Data processing and analysis will be more **complicated**
 - If we can FULLY use all data, we can do much better. But we don't know how to use. (Where?, copy right?, in-situ data?)
 - Need to improve tools of handling big/heterogeneous data.
 - Sharing **Artificial Intelligence tools?**
 - Sharing activities during emergency mapping

DAN Report (Yamaguchi University)

- ① Support International Disaster Operation in Sentinel Asia
- ② Support Domestic (Japan) Disaster with Sentinel Asia and International Disaster Charter
- ③ Support Sentinel Asia SC activity, Leading “Value Added Product (VAP)” team
- ④ Development of University Network for Massive Disaster
- ⑤ Development of Educational Material with MEXT

University Network for Data Analysis

University Network for Data Analysis

Concepts

- To conduct satellite data analysis for disaster emergency situation.
- To conduct more advanced data analysis
- This is academic activity, resarch and education.
- This is voluntary based activity.

Expected effects

- To secure data analysis resources in case of huge disaster.
- To collect local disaster information.
- To build up Asian academic network.
- To build up capacity for students.
- Students will be very imporant member in the future.
- To share our activities.

บรรยายในหัวข้อ การสำรวจระยะไกลด้วยระบบ Synthetic Aperture Radar (SAR) สำหรับภัยพิบัติ

จากความร่วมมือระหว่างมหาวิทยาลัยยามากุจิ (Yamaguchi University) ประเทศญี่ปุ่น และ ภาควิชาภูมิศาสตร์ มหาวิทยาลัยเกษตรศาสตร์ นักวิจัยของมหาวิทยาลัย Yamaguchi University Dr. Noppawan TAMKUAN, โดຍร่า สนิบูนของ Associate Professor Masahiko NAGAI เดินทางมาบรรยายในหัวข้อ การสำรวจระยะไกลด้วยระบบ Synthetic Aperture Radar (SAR) สำหรับภัยพิบัติ ในวันที่จันทร์ที่ 11 กุมภาพันธ์ 2562 เวลา 9.30 - 12.30 น. ณ ห้อง 3-601 อาคาร 3 ชั้น 6 คณะสิ่งแวดล้อม มหาวิทยาลัยเกษตรศาสตร์

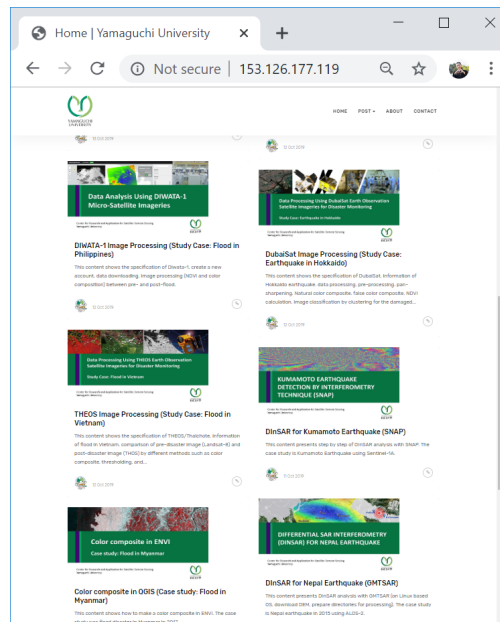

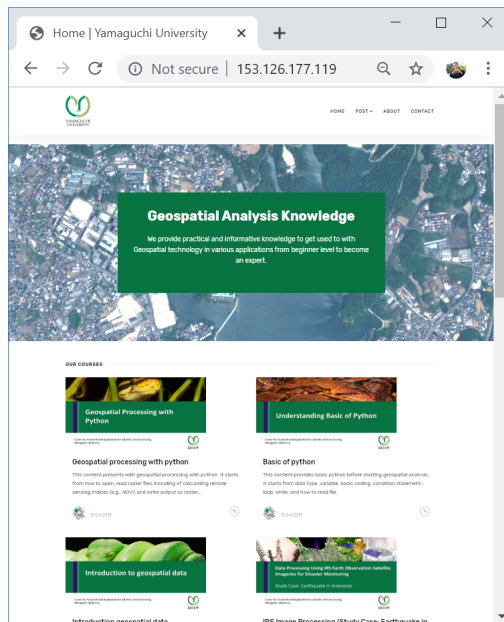

DAN Report (Yamaguchi University)

- ① Support International Disaster Operation in Sentinel Asia
- ② Support Domestic (Japan) Disaster with Sentinel Asia and International Disaster Charter
- ③ Support Sentinel Asia SC activity, Leading “Value Added Product (VAP)” team
- ④ Development of University Network for Massive Disaster
- ⑤ Development of Educational Material with MEXT

Yamaguchi University Resource (website)

- Collect materials and procedure how to analysis geospatial data especially for disaster application
- Implement to our students and university network to be able to join data analysis activity for emergency case
