

Earth Observatory of Singapore  
Remote Sensing Lab (EOS-RS)

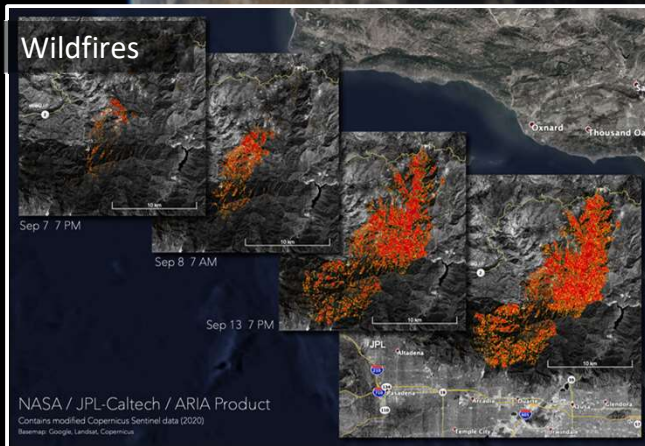

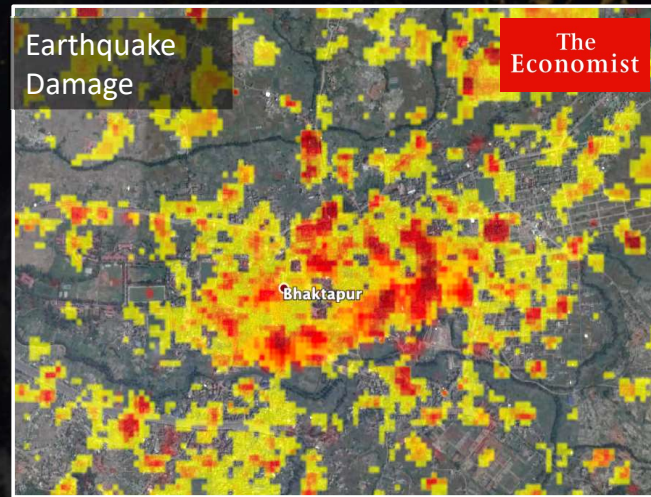

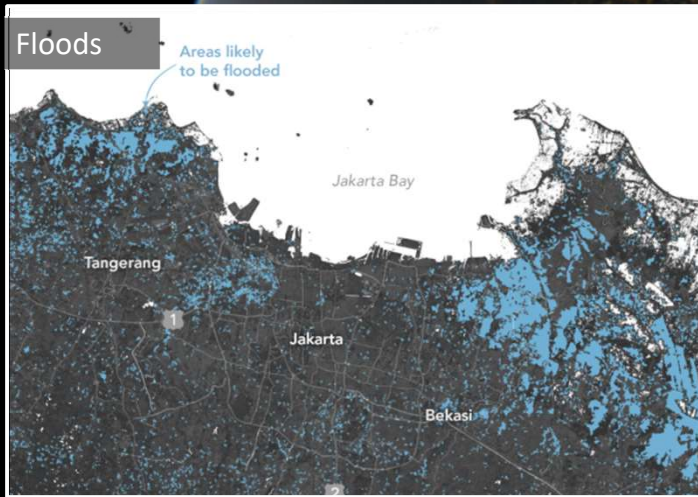

A satellite view of Earth from space, showing a large, swirling storm system over the Pacific Ocean. The Earth's surface is dark, with some yellowish-brown patches indicating land or vegetation. The storm system is a large, white, swirling mass of clouds, with a distinct eye in the center. The overall scene is set against the blackness of space.

## The Earth Observatory of Singapore – Remote Sensing Lab (EOS-RS):

- Uses remote sensing for humanitarian assistance and disaster response
- Innovates algorithms and systems for hazard analysis and societal impact

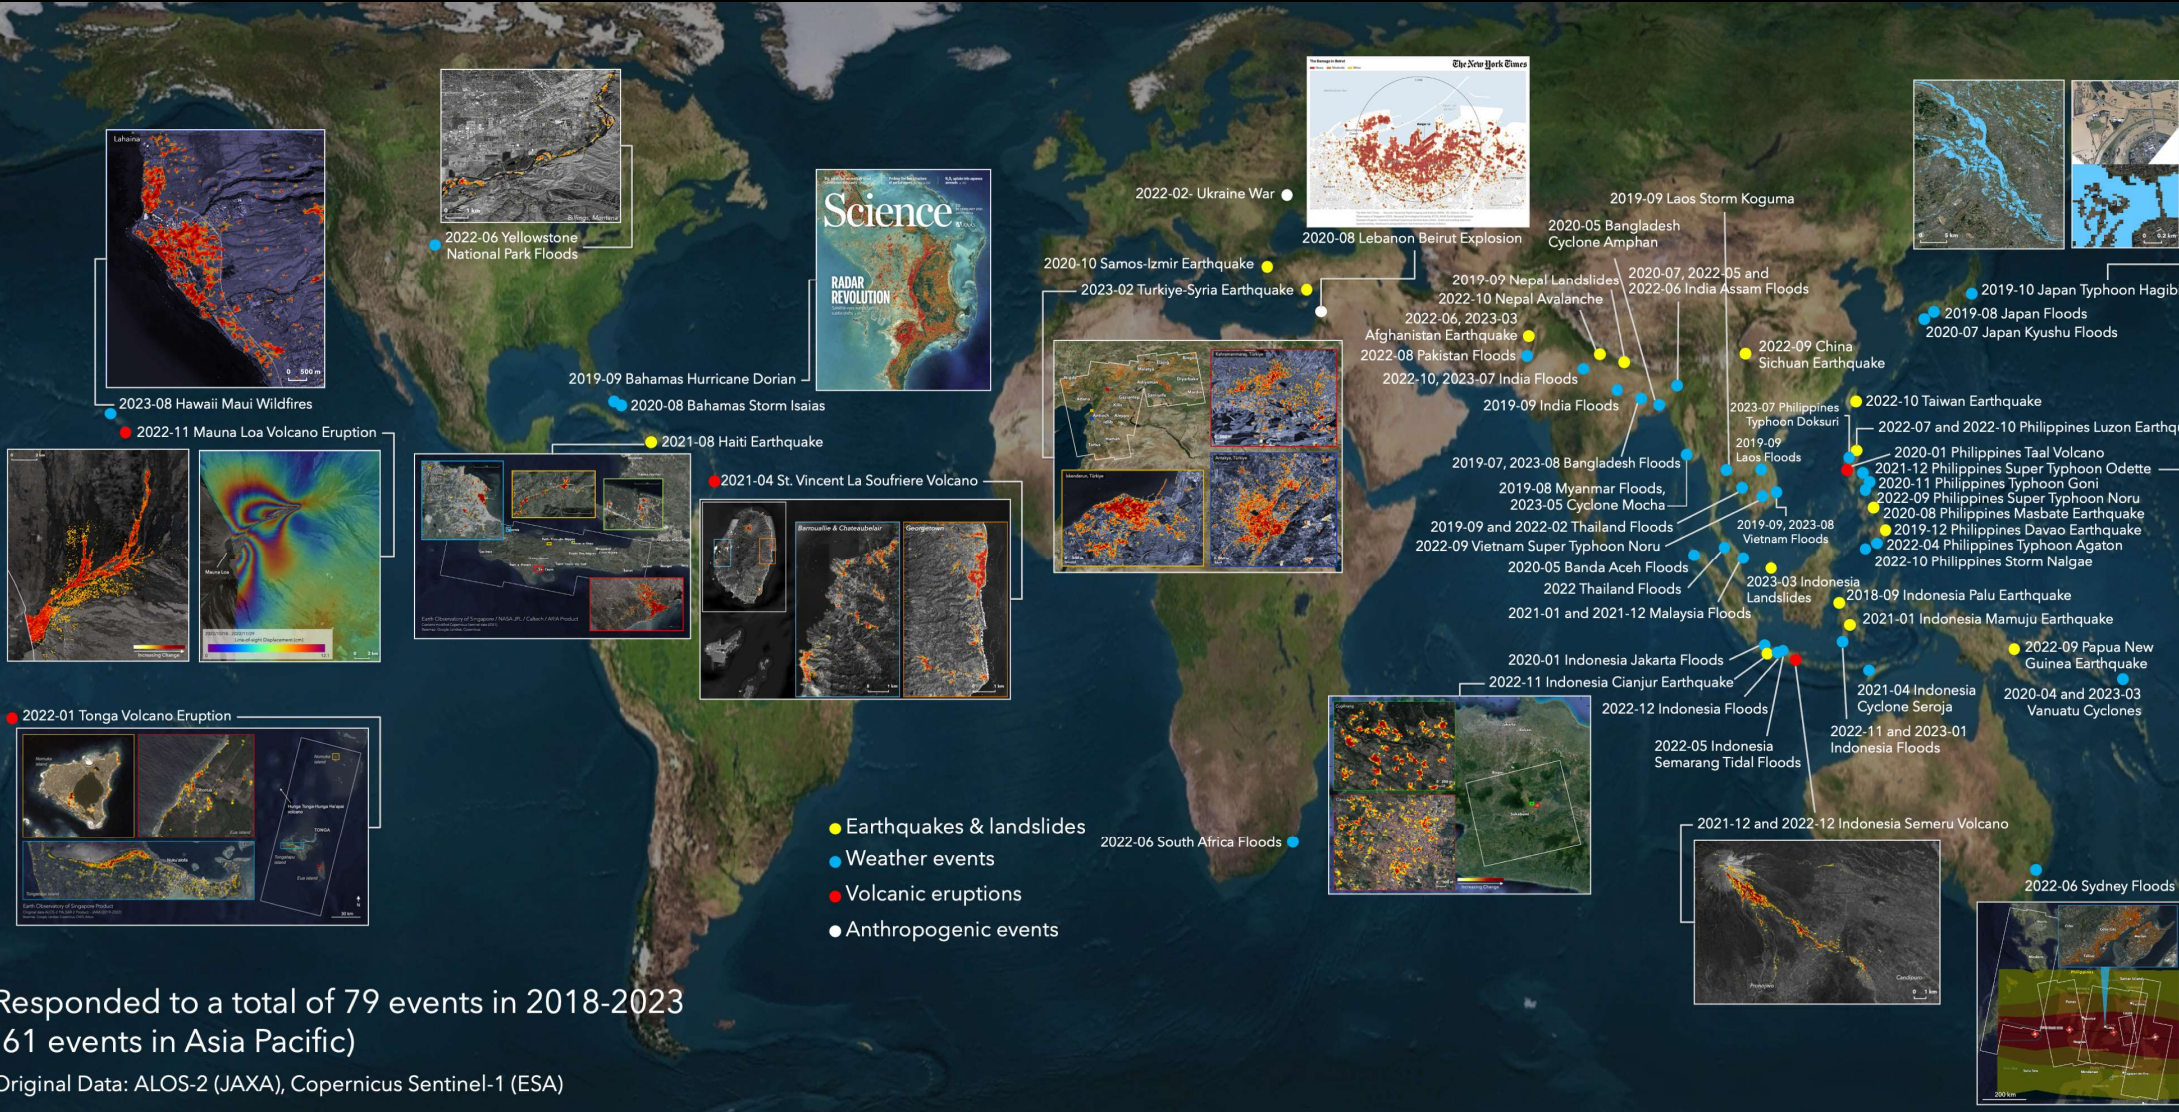

# Types of disasters we map

# Impact to date

Responded to a total of 79 events in 2018-2023  
(61 events in Asia Pacific)

Original Data: ALOS-2 (JAXA), Copernicus Sentinel-1 (ESA)

# M7.8 Türkiye-Syria Earthquake Response Support

## Timeline

- 6 Feb 2023 (M7.8 and M7.5 Earthquakes)  
EOS-RS reached out to JAXA (Japanese Space Agency).
- 8 Feb 2023  
JAXA acquired the first satellite radar data.
- 8 Feb 2023  
EOS-RS produced and disseminated the first Damage Proxy Map (DPM).
- 9 Feb 2023  
ESA (European Space Agency) acquired their first satellite radar data.
- 16 Feb 2023  
EOS-RS generated 8 DPMs using European and Japanese satellite radar data, covering the entire region (every 30 m x 30 m) impacted by the earthquake and the following aftershocks.

# August 2023 Maui, Hawaii Wildfires

CNN travel Destinations Food & Drink News Stay Video

## Hawaiians fear for historic landmarks amid Maui fires

Note: VIIRS sensors detect thermal anomalies in 375 sq. meter areas, which was used to approximate the total fire perimeter. Data collected at 3:00 p.m. E Aug. 10, 2023.

The Washington Post  
*Democracy Dies in Darkness*

## When did the fires start in Maui?

The fires began just after midnight Tuesday, Maui County Fire Chief Brad Ventura said at a Thursday news conference, and were “compounded by extreme winds that we’re all aware of,” he said. The first fire around upper Makawao burned about 675 acres, he said.

[ *Maui fires not just due to climate change but a ‘compound disaster’* ]

By 11 a.m., the Lahaina fire had begun ravaging the historical town, fueled by wind gusts up to 60 mph. The deadly blaze would go on to essentially burn Lahaina to the ground, multiple officials have said.

Around noon Tuesday, another fire started in Kula, spurring evacuations of nearby residential areas. Then, about 6 p.m., a fourth fire began on Pulehu Road in the central valley “that burned several hundred acres.”
